GETTING STARTED QUICKLY

WH8560F and WH8060F models only

- Sort your washing carefully. Separate white/light colours from dark colours. Wash new, highly coloured and dark coloured items separately to prevent dye transfer. Refer to the 'Sorting and loading' section.
- Load your clothes individually into the wash drum. Close the door.
- Use 'Low Sudsing' or 'Front Loader' liquid, powder or pods. Place liquid detergent into the correct compartment in the dispenser drawer marked ①. If you wish to use powdered detergent you **MUST** remove the liquid detergent insert by firmly grasping and twisting the left hand side of the internal compartment and pulling upwards. If you are using detergent pods place them at the back of the drum before you load your clothing. For more information on detergent refer to the 'Detergent and fabric softener' section.
- If you wish to use fabric softener, place it in the compartment marked with a ②. For more information on fabric softener refer to the 'Detergent and fabric softener' section.

IMPORTANT!

Fabric softener should not be used if you have selected the 'Super Quick' cycle.

GETTING STARTED QUICKLY

- Press 'POWER' to activate your washer.
 - Select your wash cycle by turning the SmartTouch™ Control Dial.
 - Choose your wash options, if you wish to select options different from the default options for the cycle.
 - Touch ► to start the cycle.
- If you make an invalid selection the washer will beep to alert you.
 - When the cycle finishes, your washer will perform end of cycle beeps and then turn off automatically.
 - If you wish to stop your washer at any point during a cycle simply touch ► to pause the cycle. There may be a slight delay while the drum comes to a stop, then the door will unlock. Under certain conditions however the door will remain locked for safety reasons (refer to the 'Safety features' section).
 - If you wish to cancel or change the wash cycle once a cycle has started, simply touch the ► button then select the new cycle. Touch ► to restart the washer.
- IMPORTANT!**
- For the best fabric and colour care, remove your clothes as soon as the cycle has finished.
 - Failure to follow the advice in this guide may result in damage to your garments and your expectations of wash performance may not be met.

WASHER CONTROLS

SmartTouch™ Control Dial

The SmartTouch™ Control Dial provides easy and efficient wash cycle selection. As you rotate the dial, the icon of the wash cycle selected will be illuminated, along with the default settings for that cycle on the right side of the control panel.

SmartTouch™ buttons

The smooth, easy clean buttons enable easy selection of options with lights clearly showing the selections you are making.

Digital display screen

The digital display screen provides feedback on how long the wash cycle has to go. If you have programmed a 'Delay Start', the time remaining until the cycle will start will be displayed here, along with any messages to help you with the overall running of your washer (eg user warnings).

Time to go

Your washer displays approximately how many minutes the cycle you are running has remaining, so that you can tell at a glance when your washing will be finished.

Please be aware that a number of factors can influence the overall cycle time, eg the water flow rate, water pressure, whether hot water is being used from the tap or the water is heated by the internal heater, load size, cycle and option selections. Therefore cycle times will vary. Unexpected events in a wash cycle (eg out of balance, oversudsing) can lengthen the cycle time.

Progress lights

The progress lights indicate what part of the cycle the washer is currently on (wash, rinse or spin). All three lights are on at the beginning of the cycle. The light for the current part of the cycle flashes, and each one goes out when that part of the cycle is complete.

Keylock mode

Keylock can be used to lock the buttons on your washer. This will avoid accidental button pushes. For more detail please refer to the 'Wash cycle options' section.

Drum light (WH8560F, WH8060F models only)

Your machine has a drum light to help assist you when loading and unloading your washing machine. When you press 'POWER', the LED light in the drum will turn on, after 2 minutes it will automatically turn off. At the end of the cycle, the drum light will turn on again for 5 minutes to help facilitate unloading.

SAFETY FEATURES

Door lock

The door of your washer will lock once you touch ► until the machine beeps at the end of the cycle, ensuring safety for you and your family while your machine is operating.

To unlock the door during the cycle

- You can open the door to add or remove items during the wash simply by touching the ► button. Note: the door will remain locked if the temperature inside the washer is above 60°C and/or the water level is above the bottom of the door seal (a warning will be displayed in these circumstances, refer to 'Before you call for service').
- Simply touch ►, the machine will pause and the door will automatically unlock if the conditions inside the washer are safe. The ► button and time to go will flash on the screen while the washer is paused. Open the door and remove or add garments. Close the door and touch ► to resume the cycle.

Add a Garment (WH8560F, WH8060F, WH8560P, WH8060P and WH7560P models only)

The 'Add a Garment' function can be used to interrupt the cycle to add or remove a garment at any time during the wash part of the cycle (as long as the wash temperature selected is lower than 60°C). Water in the machine will be drained to a level where the door can be opened, if necessary. Refer to 'Wash cycle options' for more information.

Opening the door during a power failure

If there is a power failure during a wash cycle your washer will stop and the door will remain locked. You can unlock the washer door to remove your clothes by opening the pump filter cover at the bottom right of your washer. Simply place a coin or key in the slot and tilt it upwards to lever the cover open, then pull the door release tab.

Door release tab

Manual door opening mechanism

IMPORTANT!

Do not attempt to do this if the water level in the washer is above the level of the door.

When power is restored you will need to restart your machine by simply pressing 'POWER'. The washer will remember where in the cycle it was up to.

Your washer also has the following protective measures:

- Flood protection - turns off valves and turns pump on if a flood condition is detected.
- Out-of-balance protection - stops and redistributes the load if an unbalanced load condition is sensed, and/or slows the spin speed to compensate.
- Excess suds protection - pauses to allow suds to break down before continuing the cycle.

Before you load

- Check pockets for items that could damage your clothes or get caught in the washer.
- Close zippers, hooks and eyes, and other fastenings (ie fasten the opening of duvet/ doona covers), and remove loose bra wires. All these can damage both your washer and your clothes.
- Place delicate items, such as lingerie, in a mesh laundry bag before placing in the machine.
- Pre-treat any stains, taking care not to spray pre-treaters on your washer as they can cause damage to the plastic surfaces.

Loading

Your washer will be more efficient when washing larger loads, so try to collect enough items to loosely fill the drum when the items are dry.

IMPORTANT!

- **Do not overload your washing machine beyond its rated capacity.**
- **Please do not under any circumstances wash an electric blanket in your washer unless the care label specifically states it is safe to do so.**
- **Do not wash curtains in this washer, as sunlight makes them brittle and they may disintegrate during washing.**

When preparing your wash load there are some important things to consider:

Sorting

Sort items according to colour, fabric type, and soil type. Wash fine, delicate fabrics separately from thick, heavy fabrics. Always separate coloured items from whites, especially when they are new. Colour run could be an issue if you wash items at higher temperatures. Some soils, like mud and blood are best washed in cold water. Oily soils (eg some foods and marks on shirt collars) are best washed in warm water. The following are recommendations for what cycles and settings you may wish to wash different items on, and suggestions for special wash requirements.

ITEMS/WASH REQUIREMENTS	SUGGESTED CYCLE AND OPTIONS*	SUGGESTED TEMPERATURE
Towels	Everyday, 1400 or 1200 rpm spin	30°C or 40°C
Sheets, pillowcases	Everyday, 1400 or 1200 rpm spin	30°C or 40°C
Bulky items - doonas, duvets, sleeping bags	Bulky	30°C or 40°C
Shirts, pants, other creasables	Easy Iron, 800 rpm	30°C or 40°C
Woolens, silks	Wool, Handwash, 500 rpm	30°C or 40°C
Delicates, fine fabrics	Delicate, Wool or Handwash	30°C
Jeans	Everyday or Heavy	Cold or 30°C
Highly coloured items	Everyday	Cold or 30°C
Whites, cotton items	Cottons, 1400 or 1200 rpm spin	40°C or 60°C
Have sensitive skin or require extra rinsing?	Allergy, Rinse+, 1400 or 1200 rpm spin	40°C
Asthma/allergies	Allergy, Rinse+	60°C
Lightly soiled items	Quick, Super Quick or TimeSaver	30°C
Muddy, sandy or linty items	Everyday, Pre Wash and Rinse+	Cold
Smelly washer	Drum Clean	90°C

* Cycles and spin speeds available will depend on your washer model.
